  • Consultation with the auditors

The interests of the unit holders in the amount shall be satisfied by an adjustment as at the end of the period in the proportion of the value of the Unit trust scheme portfolio to which the price of a unit of the relevant class is related. The TRUSTEE shall ensure that the investment policy set out herein the preceding clause is carried out.

Pricing of units
The pricing of units will be according to the net asset value of the fund.

The Fund Manager will be using Future Pricing. This means that the daily yield is established each evening and applied to transactions, which occurred during the same day. Therefore, all buying and selling (which leads to the creation and the cancellation of units) which happen during the day can only be valued at the end of the day.

Investors only know the value of their transaction the day after it occurred. The yield reflected in the newspapers and on the website daily is therefore the previous day's nominal yield.

Transactions can only be processed after a yield has been determined.

The fund manager will be using 'same date' processing. This is processing today's transactions for today.

Notwithstanding the provisions of the Trust Deed, the Fund Manager, if it considers that volatile market conditions exist, may decide to temporarily vary the price in order to reflect such market conditions. The repurchase price quoted shall be the net asset value of the APOLLO ASSET MANAGEMENT Unit Trust however computed.
